

## 13.6.6

## Merge the Earthquake Branch with the main Branch

**Basil** and **Sadhana** want to review your code for the `Earthquakes_past7days` branch. Once the code meets their approval, you can merge the branch with the main branch.

You've been creating a lot of GitHub branches in this module. However, you've only merged one branch into the main branch. Can you recall the steps for merging a branch into the main branch?

 [Retake](#)

### GITHUB

Create the pull request and merge your `Earthquakes_past7days` branch with the main branch.
